

Meri's story (interviewed by Wendy Mann)

Wendy: Meri, I know a friend of yours came to the King's Arms last week and you ended up praying for her for healing – can you tell us what happened?

Meri: Yes – she asked me to pray for her knees and as she asked me I felt God say, 'The problem's not her knees'. I asked her if she knew of anything that caused the pain in her knees and she said yes, she has flat feet, with no arch in her feet. As she told me this I felt God say to me that he wanted to give her new arches.

Wendy: So you prayed for her – tell us what happened.

Meri: I prayed for her feet and commanded an arch to grow where there had not been one. She said she could feel a tingling in the arch area of her foot and stretching across the top; and as I was praying I could feel tingling in my feet as well so I figured something was happening! Straight away she found she couldn't get the inside of her foot on the floor where it would have been, but instead it was raised up.

Wendy: So she came in with flat feet and left with arches? That's quite impressive! Shall we thank God for that? (*Cheering and clapping*). So how is she to date?

Meri: I spoke to her yesterday and the pain in her knees is diminished, and her feet still have arches.

Wendy: Come on, let's thank God again – that's an amazing miracle.
